

AERO-News

BREAKING NEWS:

Aero Enterprise is now EN **ISO 9001:2015** certified. On December 12th we passed the certification audit for the inspection of wind power and industrial plants including evaluation and reporting!

Dear readers,

with Christmas and the New Year's Eve approaching, we want to use the remaining time to look back on the eventful year 2018. Especially in the last few months, we not only intensively further developed our software and hardware, we have also been present at various conferences and exhibitions. We also carried out interesting inspection flights.

Talk at the ExpoAIR 2018

Image by (c) markusreuterphotography

From 20th to 22nd November the ExopAIR in Munich gave with more than 1,400 participants an outlook on the aerospace industry of the future. Topics included additive manufacturing, **digitization** and mobility on the ground, in the air and in space.

About 40 experts from the aerospace industry participated in the **talk of Robert Hörmann** on "Quality

assurance from the air - software supported inspection on wind turbines with flight robots". The following discussion confirmed the strong interest in the service and technology of Aero Enterprise.

Aero Enterprise goes Alps

This year, Aero Enterprise inspected two of **Austria's highest-altitude wind farms**: the Pretul wind farm from the Austrian Federal Forestry at an altitude of 1,600 m and the Tauern wind farm at 1,900 m above sea level - both in Styria. Even in atmospheric higher altitudes with thin air the **AERO**-SensorCopter proofed his full performance capacity and mastered his automatic tasks with great success.

Aero Enterprise is a participant in the EU Horizon 2020 funding program

Horizon 2020 is the world's largest transnational research and innovation program. The European Union's support-program provides a framework for **European SMEs** to achieve the following objectives: to strengthen Europe's scientific and technological excellence and competitiveness, as well as to address major social challenges in a solution-oriented manner.

The **technological development** of the **AERO**-SensorCopters Offshore is co-financed by the program Horizon 2020. The first phase of the submission has already been successfully completed. Submission for

phase two is currently in progress.

The entire Aero Enterprise team
wishes Merry Christmas!

See you soon!

Robert Hörmann, Peter Fromme-Knoch
& the Aero Enterprise team
