

Dear reader,

for you, the latest information about Aero Enterprise:

Inspections in Austria and beyond

In the past few weeks, our inspection team has mainly been in field in Austria. During these inspection flights we were able to train our **new co-pilot Marcel Thurner**, who mastered his task with success.

Our inspection team is currently engaged in operations in **Northern Europe**. But there is no off time. At the end of July the team hits the road again the opposite direction, namely to the **east of Europe**. We are already looking forward to further international operations!

Follow our social media channels so you don't miss the latest inspection operations and update images.

Postponed events in 2020

Visit Aero Enterprise at the **Global Offshore Wind Virtual Festival on July 22nd from 10 a.m. to 12 p.m. (CEST)**. This virtual exhibition functions as an interactive digital space with virtual exhibition stands, digital materials, agreed appointments etc. Therefore it enables networking and business development in these uncertain Covid-19 times.

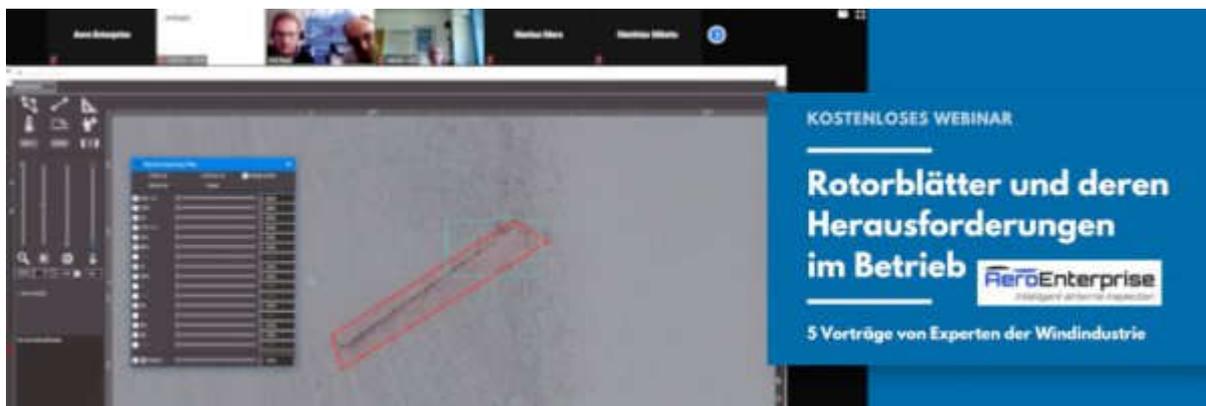

Since the spring and summer events have been postponed, we can now announce the new dates for

exhibitions in which Aero Enterprise takes part in 2020.

We look forward to meeting you soon again in person!

Eologix webinar

We were very happy to contribute to the first and very **successful eologix webinar** with around 100 participants. Together with [Reprojekt](#), Verbund, Robur and CFP + engineering, Aero Enterprise talked about rotor blades and their challenges in operation. Managing partner Peter Kurt Fromme-Knoch and software developer Michael Leitner demonstrated as experts on the subject of **"Quality assurance of wind turbines over their entire service life using drone inspection"** the possibilities of inspection using drones including analysis of the images, supported by artificial intelligence.

We thank all participants for the positive feedback and look forward to seeing you again!

Current Developments

AERO-Data customer portal

We are currently working on a new customer portal. Not only new **optical redesigns** make the portal **more user-friendly**, we programmed also features **enabling the customer to manage orders and wind farms**. Instead of handling PDF forms, our customers will soon be able to enter their data into our system via our online platform. The placement of an order as well as data entry are now even more user-friendly, easier and faster in digital form.

Our team continues to grow

Despite the Corona crisis, Aero Enterprise was not only able to keep its existing employees on a permanent basis, but also to attract new colleagues. We are happy to introduce you to **Sonja Riegert, our new business developer** from Bremen, and **Marcel Thurner, our new co-pilot** and mechatronic engineer, on our website >> [Click here to see our current team](#)

We still have an open position for an UAV pilot. Details can be found >> [on our website](#)

See you soon!

Robert Hörmann, Peter Kurt Fromme-Knoch &
the Aero Enterprise team
